HPFi[®] Introduces Timbre Bar Height Seating

HPFi (High Point Furniture Industries) is pleased to announce the latest addition to its portfolio of seating. **Timbre** bar height stools feature polypropylene seat and back engineered for comfort. The open design of the back is not only an aesthetic feature, but also a cool, breathable surface. The two-piece clam shell construction of the seat ensures a comfortable respite for longer-than-expected conversations at an HPFi **Matrix** touchdown table or an **Eve** banquette.

“**Timbre** is the first generation of new thermoplastic seating from HPFi that offers a cool solution for bar and counter height applications” said Doug Gaines, Vice President of Sales for HPFi. “**Timbre’s** perforated back design features a contemporary profile that complements today’s collaborative work and learning environments.”

Timbre chairs will be available for shipment in September, 2018.

HPFi operates a 4,100 sq. ft. showroom and two manufacturing facilities in High Point, North Carolina with over 400,000 square feet of manufacturing space. With roots in High Point, the furniture capital of the world, HPFi combines the skill and expertise of seasoned furniture craftspeople with modern day technology to deliver exceptional value to its customers.

For additional information on HPFi, please contact Tom Carrigan, Vice President of Marketing, 1104 Bedford Street, High Point, North Carolina 27263, Telephone: 336.431.7101 Ext. 2241, Fax: 336.431.0673, Email: TomC@hpfi.com.
