

CAL TB 133

Ergo/Task Seating Reception Seating

Effective January 1, 2011

Seating in this price list has been tested and certified to flammability standards of California Bulletin #133. Construction features and fabric options on pages 2-3.

CAL 133: The highest form of fire safety.

The California Bureau of Home Furnishings and Thermal Insulation developed Technical Bulletin #133, otherwise known as “Cal 133”, as an elevated level of fire resistance for contract furnishings being used in public occupancies. It was designed to increase fire safety, especially relating to buildings with many furnishings and many occupants, such as but not limited to hotel/motel, healthcare/nursing homes, arenas, etc.

This fire safety standard was first adopted by the State of California. Later, this became a common requirement in Boston, Massachusetts, where experience with catastrophic fire increased safety concern. While other states have not made this a blanket requirement, it is not uncommon to find Cal 133 a requirement on bids in New York, Ohio and several other states.

Cal 133 is a flammability standard utilizing a full-scale burn testing procedure. A finished, upholstered chair is subjected to flame and burned. During the test, several measurements are taken to determine the chair’s ability to minimize the spread of fire:

- ** Temperature Increase at Two Heights
- ** Smoke Opacity
- ** Carbon Monoxide Concentration
- ** Weight Loss of Product

Certification

For a manufacturer to offer upholstered seating as Cal 133 certified and approved, that manufacturer must build the chairs and undergo (and pass) appropriate testing. Since different combinations of materials and construction exist in order to accomplish seating that will pass the Cal 133, it is up to the manufacturer to develop its own program. Once models have been approved as Cal 133, any future orders for Cal 133 upholstered seating must be manufactured as the original test models, using the same materials, such as fabric, foam, etc.

HPFI Cal 133

HPFI offers Cal 133 certified ergonomic/task seating that has been tested and certified by an independent laboratory. These products combine HPFI’s proprietary combination of materials and construction, including an elevated level of barrier that completely surrounds the chair frame and inhibits the spread of flame. All HPFI Cal 133 chairs feature 100% recycled polyester fabrics from the Foundation 10 collection.

Pricing

All pricing delivered based on location. See zone map below.

Lead Times

All CAL133-certified models built and shipped within a standard three-week lead time. For special situations, contact customer service at 800-447-3462.

Fabric Selection: FOUNDATION 10

Foundation 10 fabrics are featured in the HPFI Cal 133 reception seating program, offering a unique blend of versatility, color selection and performance characteristics. **Foundation 10 fabrics are 100% recycled** (terratex brand), offered as part of Mayer Contract Fabrics' Eco-System Collection. All Foundation 10 Fabrics are **backed by a 10-year Wear Warranty**, covering fabric and upholstery of chair.

Key performance characteristics include:

- ** **Exceeds 1,000,000 double-rubs in surface abrasion testing**
(ASTM D 4157 Wyzenbeek Test)
- ** Exceeds 337 lbf (warp) and 324 lbf (fill) breaking strength testing (ASTM D 5034)
- ** Exceeds 43 lbf (warp) and 44 lbf (fill) tear strength testing (ASTM D 2262)
- ** Passes Class 5 (AATCC 105) color fastness testing
- ** Passes Class 5 (AATCC 105) wet and dry crocking testing

Foundation 10 Fabrics
