For Immediate Release

HPFI Introduces *Helix* Doctors' Stools

(High Point, NC) HPFI (High Point Furniture Industries) is pleased to announce the latest additions to its healthcare seating offering. Five models of the *Helix* doctor's stools are now available: black urethane seat and nylon base, upholstered seat with either a black or chrome base and upholstered seat and lumbar support with either a black or chrome base. The upholstered seat versions feature a foot activated gas lift mechanism to provide hands-free height adjustment, a very important feature for physicians from the examination room to the surgical center. Reverse braking casters are also standard on the upholstered models to help prevent accidental rolling when being seating or rising off the stool.

The upholstered versions are available in hundreds of standard fabrics, vinyls and leathers in three weeks or less. Over 60 upholsteries are available in our Quick-Ship program in an industry-leading three days! HPFI also welcomes the opportunity to upholster using the customers' own materials (COM.)

HPFI operates in two manufacturing facilities in High Point, North Carolina with over 440,000 square feet of manufacturing space. With roots in High Point, the furniture capital of the world, HPFI combines the skill and expertise of seasoned furniture craftspeople with modern day technology to deliver exceptional value to its customers.

For more information, please contact Tom Carrigan, Director of Marketing, 1104 Bedford Street, High Point, North Carolina 27263, Telephone: 336-431-7101 Ext 2241, Fax: 336-431-0673, Email: TomC@hpfi.com.
