Tables

Dining, Meeting, Training

Clique tables provide maximum flexibility, versatility and a modern aesthetic with multiple top shapes and sizes to allow for almost unlimited configurations. Choose top shapes and legs (with or without locking casters) to fit the desired configuration or layout. Assembly is simple and quick. Add modesty panels or privacy screens to complete your customized configuration.

HPFi

Rectangular / Square Tables

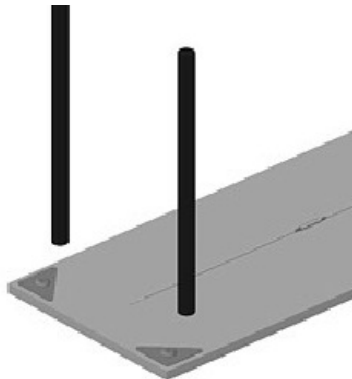

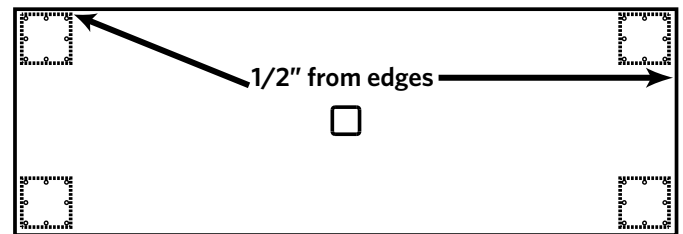

Parts	Quantity
• Top	1
• Legs with glides or casters	4
• Leg plate Screws (#9 x 1")	32
• Turnbuckle Screws (#8 x 3/4")	8
• Turnbuckle (tops longer than 48")	1

Tools Needed

- Phillips head screwdriver or power drill with Phillips bit
- 3/8" or Adjustable Wrench

Step 1. Attach Leg Plates

After carefully removing all parts from the shipping carton, place the top on a smooth, clean work surface with the square cutout (bottom) facing up. The Leg Plates from the inner carton of legs should be placed in the four (4) corners of the top 1/2" from each edge as shown below. Secure the Leg Plates with the #9 x 1" screws supplied in the inner carton of legs.

Step 2. Install Legs to Top

Carefully thread legs onto each corner Leg Plate. Grip each leg firmly with two (2) hands and tighten until they are each properly seated with no wobble. Insert leveling glides and/or casters into the bottom of each leg column and hand tighten. Glides may be adjusted to compensate for uneven floors when placed for use.

Step 3. Attach Turnbuckle

Insert the threaded ends of the two (2) rods into the coupling / turnbuckle. Place the turnbuckle assembly on the table top with the coupling placed on the square / rectangular cutout as shown. Begin tightening the rods in the coupling until the holes of the flattened end of the rod align with the predrilled holes of the top. Attach each end of the rods with four (4) each of the #8 x 3/4" screws. Resume tightening the turnbuckle with the 3/8" or adjustable wrench until it is secure. This will ensure that the top does not bow over time.
